SUMMARY

HR operations and people systems professional with 10+ years managing complex, high-volume employee lifecycles at Amazon, Walmart, and FedEx. PHR-certified and AI Fluency certified (Anthropic, 2026) — with hands-on experience building automations, API integrations, and AI-driven workflows that eliminate manual work and surface data issues in real time. Network lead for Walmart's Code Puppy AI initiative, with a track record of translating complex operational requirements into scalable, efficient processes. Brings the rigor of a compliance-minded HRBP and the instincts of a systems builder to every employee lifecycle problem.

EXPERIENCE

HR Business Partner II

Amazon
Philadelphia Region | Jan 2021 to Jun 2024

- Strategic HR partner for 500+ associates across Amazon's final-mile delivery network — owning the full employee lifecycle from onboarding through offboarding, including HRIS data accuracy, I-9 and E-Verify compliance, background adjudication, and performance documentation.
- Built and maintained employee data integrity across six delivery station launches — creating hire records, managing job changes and internal mobility, and reconciling headcount data against operational planning systems.
- Partnered cross-functionally with legal, payroll, recruiting ops, IT, and finance teams to resolve data discrepancies, support audits, and ensure compliance with federal and state employment documentation requirements.
- Selected twice for Amazon's Employee Relations Jump Team (2023) for high-stakes labor investigations requiring VP-level documentation, legal coordination, and outcome delivery under time pressure.
- Earned Global Delivery Services Amazon Excellence Award (2024) for cross-functional people operations impact.

Area Manager II — Supply Chain Operations & AI Initiatives

Walmart
Pedricktown, NJ | Jun 2024 to Present

- Network lead for Walmart's Code Puppy AI initiative — unified ten disconnected operational data sources (Power BI, QuickSight, BigQuery, attendance, procurement) into a single live command center with automated daily email summaries distributed across the regional network.
- Built a custom API integration via token authentication that resolved a supervisor's broken WMS access, recovering 2–4 hours per shift by eliminating manual data reconciliation. Deployed portable, dependency-free versions across non-technical managers.
- Diagnosed and eliminated root-cause process gaps across scheduling, shift reporting, and compliance documentation — applying Lean/Six Sigma methodology to reduce error rates and improve data accuracy.
- Served as Acting Site Manager for 8 months — owned staffing, scheduling, associate escalations, and reporting for a 50+ associate DC during a leadership vacancy.

Operations Manager, Fulfillment & Logistics

Amazon
Philadelphia Region | Dec 2019 to Jan 2021

- Managed 300+ associates across multi-shift fulfillment operations — drove process flow improvements through Lean/Six Sigma and maintained documentation standards across performance, safety, and compliance workflows.
- Supported six delivery station launches across the Philadelphia region, including onboarding infrastructure, associate record creation, and first-day experience execution at scale.

Operations Leadership | FedEx Earlier Career, Greater Philadelphia Area

Built foundational process discipline and team leadership skills in high-volume logistics operations.
