

AL SCHRAMM

Quality Assurance | Systems Operations | Supply Chain Leader

215.534.2155 • schramm.al@outlook.com • [Website](#) • Greater Philadelphia Area

PROFESSIONAL SUMMARY

Operations and systems leader with 10+ years of experience across Walmart and Amazon distribution environments, leading teams, strengthening inventory integrity, and improving execution through standard work, reporting, and disciplined follow-through. Proven ability to translate business goals into daily operating routines, coach leaders and associates to safety and quality expectations, and partner across functions to resolve issues quickly and sustainably. Brings a balanced background in operations, compliance, investigations, workforce planning, and process improvement—well suited for roles requiring quality oversight, systems execution, inventory accuracy, and people leadership in fast-paced grocery and logistics environments.

CORE COMPETENCIES

- | | |
|--|---|

PROFESSIONAL EXPERIENCE

Area Manager II — Supply Chain / Regional Realty Warehouse | [Walmart](#)

Jun 2024 – Present

- **Daily Execution:** Lead daily execution across inbound, outbound, and inventory control activities in Walmart's Regional Realty Warehouse, supporting time-sensitive store and facility needs.
- **Inventory Integrity:** Strengthen inventory integrity through tighter controls, exception follow-up, and process discipline to reduce shortages, overages, and execution risk.
- **Reporting & Visibility:** Build and maintain operational dashboards and reporting tools to track inventory, picking, closeout activity, and process performance; use trends to identify improvement opportunities.
- **Leadership:** Coach associates and leaders on safety, productivity, accountability, and standard work expectations; help create a culture of consistent execution and issue ownership.
- **Corrective Action:** Support corrective actions and process improvements by partnering cross-functionally with operations, project stakeholders, and support teams.
- **Safety & Compliance:** Maintain strong focus on safe operations through hazard awareness, follow-up, and reinforcement of company procedures and compliance expectations.

HR Business Partner II — Workforce Operations, Compliance & Investigations | [Amazon](#)

Jan 2021 – Jun 2024

- **Operational Support:** Supported high-volume fulfillment and final-mile operations with workforce planning, policy guidance, investigations, and risk reduction across a 500+ associate environment.
- **Investigations:** Led full-cycle investigations involving safety concerns, policy violations, and workplace issues; documented findings clearly and partnered with leaders on corrective action.
- **Data Analysis:** Analyzed workforce and operational data to identify trends, support staffing decisions, and improve consistency in leader response and execution.
- **Business Partnership:** Built credibility with operations leaders by balancing business needs, associate concerns, and compliance standards in a fast-paced environment.
- **Recognition:** Selected for Amazon's Employee Relations Jump Team and recognized with the Global Delivery Services Amazon Excellence Award for high-impact cross-functional support.

Operations Manager — Fulfillment & Logistics | [Amazon](#)

Dec 2019 – Jan 2021

- **Operations Leadership:** Managed multi-shift fulfillment operations with accountability for safety, quality, throughput, and service performance.
- **Process Discipline:** Drove process discipline and standard work to improve flow, reduce operational defects, and sustain performance against daily goals.
- **People Development:** Supervised and developed front-line leaders and associates through coaching, feedback, and performance management routines.

- **Cross-Functional Coordination:** Partnered across departments to remove bottlenecks, improve execution reliability, and maintain service levels in a high-volume network.

Tesla Fleet Manager | [Turo](#)

Jun 2024 – Present

- Manage fleet readiness, maintenance coordination, scheduling, and customer experience for a multi-vehicle operation requiring responsiveness, organization, and strong process control.
